

## MBST users are FOCUS TOP doctors

The magazines FOCUS and FOCUS-GESUNDHEIT annually publish a ranking of Germany's leading medical experts. They list the TOP doctors in their field of expertise as well as the leading specialists of a geographical area. In 2017, 58 of the TOP doctors listed use MBST magnetic resonance in their practices. 3 of them are even awarded as Germany's TOP doctors.

### FOCUS medical rankings help with the search for a doctor

Who is the best specialist for me? Who can I trust with my health complaints? For more than 20 years, the medical rankings of FOCUS and FOCUS-GESUNDHEIT have provided orientation and help in the search for the appropriate doctor. Their good reputation is based on the extensive research which includes recommendations by patients as well as by other doctors. In cooperation with the research institute MINQ for the list of top doctors and the Stiftung Gesundheit for the regional recommendations, doctors, senior physicians, head physicians, medical directors and medical experts are questioned about the colleagues they would consult themselves who convince with their qualification and knowhow.

### Quality criteria for TOP doctors fulfilled

58 MBST users received an especially high number of positive evaluations and are therefore ranking top among German doctors according to the strict quality criteria of the list. They are recommended as leading medical experts in their geographical area. 3 doctors are even awarded as TOP doctors – experts in their speciality with an above-average number of recommendations. These TOP doctors are Dr. Cordelia Schott, Essen, and Dr. Jörg Henning, Clinic Lahnhöhe in Lahnstein for the field of pain treatment as well as Dr. Hartmut Stinus, Orthopaedicum Northeim. All of those high-ranking, renowned doctors who have been recommended at an above-average level by patients use the MBST magnetic resonance therapy in their practices for the successful treatment of a variety of diseases and injuries of the musculoskeletal system.

### MBST therapy for the stimulation of regenerative processes

The MBST magnetic resonance therapy is a therapeutically used development based on the imaging MRI technology. MBST therapy does not use magnetic resonance to generate images but has the aim to stimulate cells on a molecular level by transferring energy in a targeted manner also metabolically and to trigger the body's own regenerative processes. MBST doesn't need surgical interventions, injections or drugs. At the moment, treated indications include among others degenerative diseases like osteoarthritis, osteoporosis and intervertebral disc damage as well as injuries of muscles, ligaments, tendons and bones. An "exceptional circle" closes with this ranking because MedTec Medizintechnik GmbH itself, the manufacturer of MBST magnetic resonance therapy, has been repeatedly awarded with the TOP 100 innovation award for German SMEs.

*The team of MedTec congratulates all doctors included in the ranking. We are proud that our MBST users are among Germany's best doctors.*

### About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
