

MBST Award 2020 goes to Dr. med. Norbert Kaltenkirchen · Trier

At the 3rd Wetzlar Medical Symposium about MBST magnetic resonance therapy, Dr. med. Norbert Kaltenkirchen was awarded for his exceptional use of MBST therapy.

MBST Award for Dr. Kaltenkirchen

Specialist for orthopaedics Dr. med. Norbert Kaltenkirchen was presented with an MBST Award at the third international medical symposium in Wetzlar. The prize was awarded for the successful use of MBST magnetic resonance therapy in the orthopaedic practice in Trier since 2008 which is also an MBST competence centre due to its large range of installed MBST therapy devices.

MedTec CEO Axel Muntermann with Dr. med. Norbert Kaltenkirchen

Orthopaedic practice in Trier – DGFAM-certified centre for osteoarthritis and DVO-certified centre for osteology

The practice is also named Centre for osteoarthritis treatment Trier and has been the first practice in Germany to be certified as centre for osteoarthritis by DGFAM e.V. (Deutsche Gesellschaft für Arthrose-Management), the German Society for Management of Arthritis. DGFAM certifies facilities which offer a conservative and surgical treatment of osteoarthritis according to international guide lines. The orthopaedic practice in Trier is also a DVO-certified centre for osteology (DVO, Dachverband Osteologie/Confederation for Osteology) and therefore has special competence and experience in prevention and treatment for patients with osteological diseases. This is especially relevant for osteopenia and osteoporosis as an increasing number of people suffers from osteoporosis. This systemic disease of the skeleton reduces the stability of the bones which causes a higher risk for bone fractures.

Dr. med. Norbert Kaltenkirchen is also a DVO-certified osteologist. The DVO is an association of all academic societies in Germany, Austria and Switzerland which deal with bone diseases. The DVO certifies doctors who focus in clinic or private practice on the treatment of patients with osteological diseases and have special experiences in the field of osteology. Dr. Kaltenkirchen has also completed further training in sports medicine, manual medicine/chirotherapy and acupuncture.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applicated with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
