

MBST Award 2020 goes to Dr. med. Volker Stolzenbach in Muehlacker

At the 3rd Wetzlar Medial Symposium about MBST magnetic resonance therapy in Wetzlar, Dr. med. Volker Stolzenbach from Muehlacker, specialist for orthopaedics and trauma surgery and specialist for specialised pain therapy, was honoured for his outstanding commitment and long-term advisory activity.

MBST Award for Dr. Stolzenbach

Dr. med. Volker Stolzenbach was presented with an MBST Award by Axel Muntermann at the gala evening during the third international medical symposium about MBST. Dr. Stolzenbach has used the MBST magnetic resonance system for more than 20 years with great success. In this time, he has not only given a large number of lectures about MBST magnetic resonance therapy but also been a competent advisor in medical questions for MedTec.

Practice philosophy: find and treat the cause, not only the symptoms

Quite often, a treatment has only a short-term effect and the complaints quickly show again. This is often the case with purely symptomatic therapeutic methods that don't consider and treat the underlying causes. But only a treatment of the cause can result in a lasting improvement. Dr. Stolzenbach uses several innovative treatment options in his private practice for orthopaedics that aim at supporting the body's own healing processes and stimulate a real healing of the damaged tissue. One of them is the MBST therapy system.

"My specialist training largely centered around surgical treatment methods, as is the case for all orthopaedists. In my own practice, I focused increasingly on avoiding surgery whenever possible. Treatment methods that support or stimulate endogenous weakened powers of self-healing aim at treating the cause of the pain. Their effect doesn't come as fast as that of pain killers or cortisone because these healing processes take time but they work sustainably. The damaged tissue, for example a tendon or the cartilage in the joint, can recover, regenerate, rejuvenate. And these regenerating treatments also have very few side effects", says Dr. Stolzenbach.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
