

MBST Award 2020 · Practice for orthopedics and sports medicine in Leipzig

At the 3rd Wetzlar Medical Symposium in Wetzlar, Dr. med. René Toussaint from Leipzig was honoured with an MBST Award for outstanding achievements in therapy application in professional sports. The specialist for orthopedics, sports medicine, manual medicine, physical therapy and social medicine is owner of the Practice for orthopedics and sports medicine am Bruehl in Leipzig and team doctor of the handball team men of SC DHfK (premier league) and others.

MBST Award for Dr. med. René Toussaint

At the gala evening on the 6th of March 2020 during the 3rd international medical symposium about MBST magnetic resonance therapy in Wetzlar, Dr. med. René Toussaint was honoured with an MBST Award.

MedTec Managing Director Axel Muntermann with Dr. med. Rene Toussaint

MBST magnetic resonance therapy in handball

According to Dr. Toussaint, every handball player active in the season 2016/2017 had to pause for about 30 days due to some injury. So

he started to wonder if downtime and treatment time could be influenced by an innovative, non-surgical therapy. In his lecture at the Wetzlar Medical Symposium, he presented several case studies about how MBST magnetic resonance therapy can positively influence the course of healing after trauma and thereby secure an early therapy success compared to the single use of basic therapy. One of the cases showed a burn that was successfully treated with the wound healing therapy of the MBST therapy device ARTHRO-SPIN-FLEX. The pro athlete wasn't absent for a single day. Other cases gave an impression of the way in which wound healing and regeneration after surgery can be improved with the course of healing being accelerated by applying MBST treatment. Moreover, he explained about MBST also being a very good option in the treatment of children. As an alternative to injections or surgery, MBST is less traumatic, without known side effects or interactions and can shorten the course of healing.

"MBST magnetic resonance therapy has several advantages over other treatments", Dr. med. René Toussaint stated. "The non-invasive treatment is easily available and applicably, has no side effects and can shorten the time of healing."

Dr. med. René Toussaint · MBST treatment centre · Molecular Biophysical Stimulation

He is a specialist for orthopedics, sports medicine, manual medicine, physical therapy and social medicine, owner of the Practice for orthopedics and sports medicine am Bruehl in Leipzig. Dr. Toussaint is team doctor of the handball team men of SC DHfK (premier league) and tournament doctor at "Leipzig open", an ITF tournament of tennis women.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
