

Successful market entry of MBST magnetic resonance in India

Millions of people around the world suffer from degenerative disease of the locomotormusculoskeletal system such as osteoarthritis, osteoporosis and disc problems. Since mid June, patients in India also can decide for treatment with the innovative MBST magnetic resonance therapy. The German therapy has been used successfully in Europe for almost 20 years.

First MBST treatment centre in Bangalore

In a festive celebration, Surendra Bhandari opened the first MBST treatment centre iRevive in Bangalore's centre in the state of Karnataka in South India. The managing director of IEM International Pvt. Ltd. is proud that his company can now offer treatment with the non-invasive and free of side-effects MBST therapy to Indian patients. The success of the first treatments with MBST that were presented at the press conference aroused a great deal of interest among the invited doctors, patients and journalists. Many doctors and patients made use of the chance to get extensive information about the MBST magnetic resonance therapy in lectures by German MBST experts that were held in the following evenings.

MBST for the stimulation of regenerative processes

The world wide unique MBST magnetic resonance therapy is an alternative to purely symptomatic treatments. It is a therapeutically used development based on the technology known from the diagnostically used MRI. The aim of MBST is to treat the cause of the disease and with that the cause of the pain by the stimulation of the body's own regenerative processes. Patients tell about a distinct reduction up to complete freedom of pain and an increased flexibility of the joints. In this way, many movements and activities that were painful or could hardly be done before become possible again. No surgical interventions, injections or drugs are necessary. At the moment, treated indications include among others degenerative diseases like osteoarthritis, osteoporosis and intervertebral disc damage as well as injuries of muscles, ligaments, tendons and bones.

Hightech medical technology Made in Germany available for patients in India

Axel Muntermann, founder of MedTec Medizintechnik GmbH, the company that develops and manufactures MBST treatment systems, was also present at the opening ceremony and explained the mechanism of action of the therapy devices. "We have successfully treated more than 300,000 patients worldwide with MBST. There are 1,200 therapy units in 39 countries and we are very glad that MBST has come to India now as well", he concluded.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
