

MBST magnetic resonance therapy new in Wolfsburg

Treatment options that might help to prevent surgery and the intake of pain killers in the case of joint complaints are more and more in demand. The MBST magnetic resonance therapy which fulfills exactly these requirements is available in the orthopaedic practice of Dr. med. Samer Diab in Wolfsburg since July 2020.

Degenerative diseases are on the rise

Medical progress helps us to become older and older. But this also increases the risk of being affected by a degenerative disease such as osteoarthritis. Many people need medical help in order to be able to enjoy the extra time as painlessly as possible while maintaining their independent life. Far too often, surgical interventions are recommended quickly. Modern medicine also offers numerous non-surgical treatment options, such as the MBST magnetic resonance therapy.

Therapeutically used magnetic resonance technology

MBST magnetic resonance therapy is a therapeutically used development based on the principle of magnetic resonance known from MRI. But MBST is not used for diagnostic purposes but uses magnetic resonance for the bio-physical stimulation of specific cells. Scientific data suggests that the pain-free and silent MBST therapy may trigger various processes in the treated tissues with an effect that can persist for years. Successfully treated patients report that they could avoid surgery and their pain was reduced up to complete freedom of pain.

MBST magnetic resonance medical technology in Dr. Diab's practice

The treatment options in the orthopaedic practice of Dr. med. Samer Diab in Wolfsburg are supplemented with another non-surgical therapy for the targeted treatment of pain and functional impairments of patients suffering from osteoarthritis and other degenerative diseases of the musculoskeletal system: the MBST magnetic resonance therapy. The two different MBST therapy devices allow the treatment of osteoarthritis of all joints as well as disc complaints and injuries of muscles, tendons, ligaments and bones of the limbs.

Successful information event

The new treatment option was presented to interested persons on the 9th of July in a free information event. In a small group meeting directly in the practice premises, affected patients could get detailed information about the MBST magnetic resonance therapy.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
