

Member of the Bundestag Hans-Juergen Irmer visits MedTec in Wetzlar

With Hans-Juergen Irmer's visit this week, MedTec Medizintechnik GmbH could welcome a member of the German Bundestag to its headquarters. The occasion were the recent awards the company has won this year: again being one of the TOP100 Top-Innovators, in 2020 for the fourth time, the German Brand Award and now also the nomination for the German Medical Award which will be presented in November.

After the visit of his fellow party member Frank Steinraths, member of the Hessian Landtag, in July 2020, Hans-Juergen Irmer took the time to get to know the Wetzlar-based company who specialises in medical technology. Hans-Juergen Irmer was a member of the parliament of Hesse for more than 15 years, and partly also vice parliamentary party leader, before he moved to the Bundestag in 2017 as member of parliament for the CDU.

Innovative medical technology from Wetzlar

MedTec Managing Director Axel Muntermann gave the Member of the Bundestag for the region Wetzlar/Lahn-Dill not only an insight into the more than 20 years of company history and the development of the unique technology. He also explained the principle of action and the fields of application of the therapeutically used magnetic resonance. As publisher of the quarterly "Gesundheitskompass Mittelhessen" (Health Compass Mittelhessen), health-related

topics and therapy options for different diseases are of course always interesting for Mr. Irmer to inform the readers in the area comprehensively about available treatments. The discussion of the fields of application of the MBST magnetic resonance therapy which is developed and distributed exclusively by MedTec also turned to future possibilities of usage which arise from the active principle on the level of the cells.

MBST magnetic resonance therapy devices · Made in Germany

To conclude a for both sides informative meeting, Axel Muntermann showed the Member of the Bundestag around the in-house showroom where all MBST therapy devices, which are solely developed in Wetzlar and produced in Germany, can be seen.

MedTec thanks Hans-Juergen Irmer for the interesting discussion and hopes to welcome him again some time.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
