

## New MBST licensee for Great Britain

*The demand for non-surgical treatment options for degenerative diseases like osteoarthritis is rising worldwide. With Cell Regeneration Ltd., MedTec Medizintechnik GmbH has given the license for the distribution rights in Great Britain to an experienced partner who will take the expansion of MBST magnetic resonance therapy in his hands to make this therapy available for more and more patients.*

### Therapeutical magnetic resonance technology

As in all industrial nations, degenerative diseases of the musculoskeletal system have become widespread in Great Britain affecting millions of people. Cell Regeneration Ltd. opened the first MBST treatment centre of the country in 2011 after Ann Clare was convinced about the various possibilities of the innovative MBST technology at a conference about osteoarthritis therapy.

Since then, the company under the management of Ann Clares children Liz and Charles Clare has had a determining influence on the formation of a network of clinics with the same aim: to provide the very best treatment with the focus on patient comfort, care and satisfaction. With their acceptance of the nation-wide license for distribution of MBST, not only patients in the treatment centre in Stamford profit from the company's extensive experience with the MBST Therapy but also its future business partners.

### MBST locations in Great Britain

With the installation of 4 further MBST therapy devices of the latest generation of technology this August, the number of the MBST treatment centres could already be increased. Patients can now ask for MBST therapy in the treatment of for example osteoarthritis, osteoporosis, injuries of muscles, tendons, ligaments and bones as well as wound healing disorders in Bath, Bingham, Bournemouth, Bristol, Potters Bar, Rutland, Sheffield and Stamford.

the Wetzlar Medical Symposium

We are looking forward to the continuation of our longterm successful and pleasant cooperation with Cell Regeneration Ltd., now as our official MBST license partner for Great Britain.

### About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applicated with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
