

Mayor Semler visits MedTec

The Mayor of Wetzlar Harald Semler visited the headquarters of MedTec Medizintechnik GmbH today. He was accompanied by Rainer Dietrich of the office of economic development. Founder and president Axel Muntermann and Sales & Marketing Director Guido Finkes informed the city's representatives about the basics of technology and active principle of the MBST therapy system that MedTec has developed.

MBST therapy for the non-invasive stimulation of regenerative processes

MBST magnetic resonance therapy is a therapeutic development from the technology that is known from MRI. But MBST is not used for diagnostic purposes but uses the effect of magnetic resonance to biophysically stimulate specific cells. Scientific data shows that the pain-free and silent MBST therapy can stimulate regenerative processes in the treated tissues that can even be noticeable after several years. Thus, surgery can be prevented in many cases and pain might be reduced up to complete disappearance. The MBST therapy has a causal approach in the treatment of degenerative diseases of the cartilage. That means it aims directly at the cause of the disease. In the treatment of injuries and other indications MBST is used for its anti-inflammatory, pain-relieving effects and to actively accelerate healing processes, also preventive, postsurgical and rehabilitation-accompanying.

Innovative hightech medical technology from Wetzlar

Development and production of the patented therapeutic technology is only done at the headquarters in Wetzlar. Today, the unique hightech therapy devices are used in more than 40 countries worldwide. MedTec Medizintechnik GmbH has repeatedly been awarded as TOP 100 · Top-Innovator of German SMEs for its innovation management and has also been nominated for the Health Media Award.

MBST in professional sports with the handball team of HSG Wetzlar

It is not widely known that MedTec also supports the premier league handballteam of HSG Wetzlar with its therapy devices. Philipp Poeter, the former player Philipp Weber and lately Alexander Hermann were among those who profited from the regenerative approach of MBST therapy in the treatment of injuries.

About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
